

Refrigeration Decks

For this months VRS Tech Tips we are going to talk about how we rebuild Refrigeration Decks.

This is because most of you just replace the deck when it is bad and replace it with a rebuilt deck.

We wanted to show you what we do to rebuild your refrigeration decks.

10-Point Rebuilding Process

1. Pressure cleaning of all decks.
2. Checking of all refrigeration lines for leaks.
3. Compressor replacement if necessary.
4. Evaporator replacement if necessary.
5. Condenser fan replacement if necessary.
6. All units are re-charged with Freon to operational levels
7. Operational check for leaks using electronic equipment.
8. Operational check for proper cooling.
9. Packing in custom boxes.
10. Guaranteed with the VRS 1-year warranty
